

Personal Training

Personal training is a program that is designed to meet each client's specific needs. Whether you are looking to lose weight, shape up, train for an event, gain strength, or work toward more specific fitness goals, you will benefit from our Personal Training program.

A Personal Trainer is not only a coach, but can also be your confidant, role model, educator, and a major source of motivation and encouragement.

Set up a program with your personal trainer that works for you. Some people want to meet 2 or more times per week because it helps keep them accountable to someone else for their exercise. Others only want to meet occasionally for assessments, updates, or feedback.

Health Coaching

Health coaching is a process that facilitates healthy, sustainable behavior change.

Health coaches help clients make positive and lasting changes to their health. The coach guides clients through the process of creating a vision for their health and well-being, developing a healthy mindset and healthy habits, and encouraging them every step of the way until they accomplish their goals.
